

CHARAN BS

UI/UX Designer • Full Stack Developer • AI/ML Engineer • Data Analyst

Email : charan201204@gmail.com

Phone : +91 91130 10019

Location : Hassan, Karnataka

Portfolio : charan-bs-website.onrender.com

GitHub : github.com/CharanBS18

LinkedIn : linkedin.com/in/charan-bs-b34975391

PROFESSIONAL SUMMARY

Versatile technology professional with expertise spanning UI/UX Design, Full Stack Development, AI/ML Engineering, and Data Analysis. Proven ability to design beautiful, user-centric interfaces; build and deploy scalable web applications; engineer intelligent AI pipelines using LangChain, RAG, and OpenAI APIs; and extract actionable insights from data using Python, Pandas, and visualisation tools. Portfolio includes multiple live, deployed projects across 3D web experiences, AI diagnostics, and interactive dashboards — reflecting end-to-end capability from concept to production.

EDUCATION

Bachelor of Engineering (AI & ML)

Rajeev Institute of Technology

Hassan, Karnataka

Relevant Coursework: Data Structures & Algorithms, DBMS, Machine Learning, AI, Statistics, Web Development, HCI, Multimedia Design

SKILLS & EXPERTISE

UI/UX & Visual Design

Figma	Adobe Express	Canva	Blender (3D)
DaVinci Resolve	Wireframing	Prototyping	Design Systems

Full Stack Development & 3D Web

JavaScript (ES6+)	HTML5 / CSS3	Three.js	WebGL
React.js	Node.js	Vite	Tailwind CSS

AI / ML Engineering

Python	LangChain	RAG Pipelines	OpenAI APIs
TensorFlow	PyTorch	scikit-learn	Hugging Face

Data Analysis & Engineering

Pandas	NumPy	Matplotlib	Seaborn
SQL	Streamlit	Vector Databases	Feature Engineering

Tools & Platforms

Git / GitHub	FastAPI	REST APIs	Render / Vercel
GitHub Pages	Jupyter Notebook	Google Colab	Postman

PROJECTS

Plant Health RAG — AI Diagnostic Application

Python | Streamlit | LangChain | RAG | OpenAI API | Vector DB | Deployed

- Built an AI-powered plant disease diagnostic tool using a full RAG pipeline: ingestion, chunking, embedding, retrieval, and LLM generation.
- Integrated OpenAI API for context-grounded natural language responses; evaluated and optimised retrieval for accuracy.
- Deployed as a live production Streamlit application serving real users.
- Live: planthealthrag-fsggg4j6desaboqkfomqeb.streamlit.app

Cinematic 3D Car Website

Three.js | Vite | WebGL | JavaScript | Scroll Animation

- Developed a scroll-driven 3D product launch website with cinematic camera animations and real-time WebGL rendering.
- Engineered smooth Three.js scroll-synchronised animations and optimised to a consistent 60fps on desktop.
- Live: charanbs18.github.io/carwebsite

Cinematic Drone Showcase

Three.js | WebGL | 3D Animation | JavaScript

- Created a 3D drone explosion visualisation with scroll-driven part decomposition, studio lighting, and minimal UI overlay.
- Managed a complex scene graph with multiple mesh components animated independently on scroll events.
- Live: charanbs18.github.io/drone-website

Lumina Volt — EV Charging Station Finder

WebGL | REST APIs | Geolocation API | Python | JavaScript

- Designed and developed a premium EV station finder integrating real-time REST API data, geolocation-based routing, and 3D path visualisation.
- Implemented distance calculation logic and dynamic route rendering between user origin and nearest station.
- Live: charanbs18.github.io/EV-project-PPT

SOFT SKILLS

Problem Solving	Analytical Thinking	Creative Engineering	Attention to Detail
Self-Directed Learning	Communication	Collaboration	Adaptability

LANGUAGES

English — Professional

Kannada — Native

Hindi — Conversational

DECLARATION

I hereby declare that all the information furnished above is true and correct to the best of my knowledge and belief.
